PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant : Dubois et al.
Appl. No. : 10/567,197
Filed : September 21, 2006
For : POLYMER-BASED
COMPOSITES COMPRISING
CARBON NANOTUBES AS A
FILLER, METHOD FOR
PRODUCING SAID
COMPOSITES, AND
ASSOCIATES USES
Examiner : Unknown
Group Art Unit: 1754

CERTIFICATE OF FAX TRANSMISSION

I hereby certify that this correspondence and all
marked attachments are being facsimile
transmitted to the Office of Initial Patent
Examination Customer Service Center at 571-
273-8300 at the U.S. Patent and Trademark
Office on the date shown below:

July 11, 2007

Marina L. Gordey, Reg. No. 52,950

REQUEST FOR CORRECTED FILING RECEIPT

Commissioner for Patents
P.O. Box 1450
Office of Initial Patent Examination
Customer Service Center
Alexandria, VA 22313-1450

Dear Sir:

Applicant hereby requests that the Official Filing Receipt, a copy of which is enclosed, be corrected to reflect the following: in the title, please add a comma after the word FILLER. For your convenience, a copy of the first page of the specification and cover page of the PCT publication is enclosed.

Appl. No. : 10/567,197
Filed : September 21, 2006

We look forward to receiving the corrected filing receipt in due course.

Respectfully submitted,

KNOBBE, MARTENS, OLSON & BEAR, LLP

Dated: July 11, 2007

FILING RECEIPT

OC000000023594491

Date Mailed: 05/02/2007

Receipt is acknowledged of this regular Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please mail to the Commissioner for Patents P.O. Box 1450 Alexandria Va 22313-1450. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).

Polymer-based composites comprising carbon nanotubes as a filler, method for producing said composites, and associated uses

Preliminary Class

502

PROTECTING YOUR INVENTION OUTSIDE THE UNITED STATES

Since the rights granted by a U.S. patent extend only throughout the territory of the United States and have no effect in a foreign country, an inventor who wishes patent protection in another country must apply for a patent in a specific country or in regional patent offices. Applicants may wish to consider the filing of an international application under the Patent Cooperation Treaty (PCT). An international (PCT) application generally has the same effect as a regular national patent application in each PCT-member country. The PCT process **simplifies** the filing of patent applications on the same invention in member countries, but **does not result** in a grant of "an international patent" and does not eliminate the need of applicants to file additional documents and fees in countries where patent protection is desired.

Almost every country has its own patent law, and a person desiring a patent in a particular country must make an application for patent in that country in accordance with its particular laws. Since the laws of many countries differ in various respects from the patent law of the United States, applicants are advised to seek guidance from specific foreign countries to ensure that patent rights are not lost prematurely.

Applicants also are advised that in the case of inventions made in the United States, the Director of the USPTO must issue a license before applicants can apply for a patent in a foreign country. The filing of a U.S. patent application serves as a request for a foreign filing license. The application's filing receipt contains further information and guidance as to the status of applicant's license for foreign filing.

Applicants may wish to consult the USPTO booklet, "General Information Concerning Patents" (specifically, the section entitled "Treaties and Foreign Patents") for more information on timeframes and deadlines for filing foreign patent applications. The guide is available either by contacting the USPTO Contact Center at 800-786-9199, or it can be viewed on the USPTO website at <http://www.uspto.gov/web/offices/pac/doc/general/index.html>.

For information on preventing theft of your intellectual property (patents, trademarks and copyrights), you may wish to consult the U.S. Government website, <http://www.stopfakes.gov>. Part of a Department of Commerce initiative, this website includes self-help "toolkits" giving innovators guidance on how to protect intellectual property in specific countries such as China, Korea and Mexico. For questions regarding patent enforcement issues, applicants may call the U.S. Government hotline at 1-866-999-HALT (1-866-999-4158).

LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING

LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Bureau of Industry and Security, Department of Commerce (15 CFR parts 730-774); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

PATENT

**POLYMER-BASED COMPOSITES COMPRISING CARBON NANOTUBES AS A
FILLER, METHOD FOR PRODUCING SAID COMPOSITES, AND ASSOCIATED
USES**

Field of the Invention

[0001] The present invention relates to the field of materials and more particularly to the field of the composite materials defined below as microcomposites and nanocomposites.

[0002] The present invention relates especially to a process for obtaining a composite material comprising a matrix of at least one polymer in which are dispersed carbon nanotubes serving as filler. The present invention also relates to said composites thus obtained and to uses thereof in the field of nanotechnology.

Prior art

[0003] Polymer materials were developed at the start of the 20th-century and they currently occupy an increasingly important place in our daily life.

[0004] For that very reason, industrial pressure is currently such that it demands increasing specialization of applications, and it is thus necessary to propose more and more efficient materials to satisfy this need.

[0005] In the case of polymer materials, this demand implies the provision of solutions to overcome the inherent weaknesses of these materials, which are especially their relative lack of mechanical strength and their flammable nature.

[0006] It has thus been proposed to combine these polymer materials with other components known as "fillers" in order

(54) Title: POLYMER-BASED COMPOSITES COMPRISING CARBON NANOTUBES AS A FILLER, METHOD FOR PRO-
DUCING SAID COMPOSITES, AND ASSOCIATED USES(54) Titre : COMPOSITES A BASE DE POLYMERE COMPRENANT COMME CHARGE DES NANOTUBES DE CARBONE:
PROCEDE D'OBTENTION ET UTILISATIONS ASSOCIES(57) Abstract: The invention relates to a method for producing carbon nanotubes in a dispersed state, said method being charac-
terised in that it comprises a stage whereby polymerisation is carried out from at least one so-called monomer of interest, in the
presence of a catalytic system, said catalytic system comprising a co-catalyst/catalyst catalytic couple that is supported by a catalyst
carrier, said catalyst carrier corresponding to said carbon nanotubes. The invention also relates to composite materials obtained by
said method, and to a catalytic system for implementing said method. The invention further relates to the use of the inventive method
and products in the field of polymers, especially that of nanotechnologies.
